

Hello Thunderstruck shareholders,

Please follow the links below to a number of recent updates on our Fijian prospects, including our current exploration program at the Liwa gold/silver asset where our maiden drill program is well underway.

September 27,2021 corporate presentation: [Thunderstruck Resources presentation Sep-27](#)

We regularly update pictures on our webpage, you can see them here: [Thunderstruck Resources - Pictures](#)

Our twitter account has a number of new updates and pictures of recent new outcrop discoveries at Liwa:

[Thunderstruck \(@AWETSXV\) / Twitter](#)

We announced a small financing recently to fund our expanded exploration program at Liwa. See the news release here: [Thunderstruck Resources - Thunderstruck Announces Liwa Gold/Silver Prospect Exploration Financing](#)

If you are interested in participating in the financing, please contact Rob Christl asap. (see contact info below)

The next few months we will have a steady flow of drill core assays from Liwa (first core at lab now), soil/rock sampling assays from Korokayiu (copper /zinc asset JV'd with JOGMEC) as well as new rock and soil assays from Liwa.

On behalf of all of us at Thunderstruck Resources, we thank you for your continued support!

Rob Christl
